

CLEANING SAND FILTER WITH FILTER CLEANER

1. Cut off filter.
2. Shut valves off.
3. Take clear lid off pump.
4. Pour Filter Cleaner in black strainer pot.
5. Put clear lid back on.
6. Open valves back up.
7. Turn multi-port valve to backwash for approximately 8 seconds; just long enough to empty Filter Cleaner from strainer pot into the filter. Then cut filter completely off.
8. Leave filter off for 24 hours, leave valves closed.
9. 24 hours later, open valves and backwash until water is clear.
10. Bring back a water sample, and we will tell you what to do next.
